

Brainstorming & Idea Prioritization Template

Date	24 June 2026
Team ID	RW-2026-01
Project Name	Rising Waters
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	P Karthik Sai	AI-Based Flood Prediction using XGBoost	Artificial Intelligence	G1
2	V Vijay	Real-Time Weather Monitoring Dashboard	Web Application	G1
3	L Shivani	Flood Risk Alert & Notification System	Disaster Management	G1
4	D Hemanth Kumar	Rainfall Prediction using ML	Machine Learning	G1
5	Team	Integrated Rising Waters Platform	Final Selected Idea	G1

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Rising Waters – AI-Based Flood Prediction System	High	High	1	Yes
2	Weather Dashboard	Medium	Medium	2	No
3	Rainfall Predictor	High	Medium	3	No

OUTCOME:

The brainstorming session generated multiple innovative ideas related to flood prediction and disaster management. After evaluating each idea based on feasibility, impact, and implementation complexity, the team selected the "Rising Waters – AI-Based Flood Prediction System" as the final solution. The chosen idea integrates machine learning, real-time weather monitoring, and an intelligent alert system to provide accurate flood predictions and timely warnings. This solution was prioritized because of its high feasibility, significant societal impact, scalability, and ability to enhance disaster preparedness while reducing the risks associated with floods.
