Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS 1. We need early flood warnings. 2. Accurate predictions save lives. 3. Reliable alerts help emergency planning.	THINKS 1. Current systems are often delayed. 2. AI can improve prediction accuracy. 3. Better data supports better decisions.
Ramesh Kumar (District Disaster Management Officer)	
DOES 1. Monitors rainfall and river levels. 2. Coordinates rescue teams. 3. Issues evacuation and warning notices.	FEELS 1. Responsible for public safety. 2. Concerned during heavy rainfall. 3. Confident with accurate predictions.
